Dear Hiring Manager,

I am excited to apply for the React Developer Role at M365Connect. With a strong background in backend and full-stack development, I have experience designing and implementing scalable applications using technologies such as Javascript, Node.js, MongoDB and containerized environments like Docker and Kubernetes.

I have contributed to microservices development, integrating RESTful APIs and optimizing system performance to handle large-scale banking transactions. I have also worked on enterprise-grade applications, implementing secure and scalable backend solutions while collaborating with cross-functional teams. My hands-on experience with CI/CD pipelines, cloud platforms and database optimization aligns well with the role's requirements.

I am eager to bring my expertise in cloud computing, API development and system performance optimization to your team. I look forward to the opportunity to discuss how my experience can contribute to your goals.
